```
punkto grandeco = Matematike KvadRadiku lTuton
punkto rado = Matematike KvadRadiku nombron
vero perfekta = tutaRado estas rado ~ Declaring a bool as an adjective is valid
teksto panikMesagxo ~ Declaring a string without defining it
```

```
panikMesagxo += mesagxo
panikMesagxo!
tuto lTrio \
```

```
~ Booleans:

~ Are declared as conjugated adjectives

~ values: true = veras, false = malveras

~ boolean checks:

~ == true - veras

~ == false - malveras (ne veras would also be acceptable but not conventional.

~ This would be the same as "if b != true...")

~ do not write "estas (mal) vera"

vero saluto malveras

se saluto veras,

Diru "Ni devas saluti vin!"

alie,

Diru "Ni ne devas saluti vin.".
```
